Tools & IDEs	Core Concepts	Programming	Web Basics	Cloud & OS
<ul style="list-style-type: none">• VS Code, Eclipse• Github	<ul style="list-style-type: none">• OOP• Data Structures	<ul style="list-style-type: none">• Java• Python	<ul style="list-style-type: none">• HTML• CSS	<ul style="list-style-type: none">• AWS(EC2 basics)• Windows

PROJECTS

Healthcare Chatbot for Symptom Assistance

- Built a healthcare chatbot using Python + Flask and deployed it locally as a working web application
- Applied NLP preprocessing with NLTK and used TF-IDF + cosine similarity for response matching.
- Designed a clean front-end using HTML/CSS for user interaction.

Bus Booking Flow Project – Validation & Testing

- Worked on a bus booking flow project and validated key user actions using scripts and test steps.
- Improved reliability by verifying expected results across multiple test runs and learning debugging methods.

AWS Practice – Windows EC2 Instance Setup

- Created and configured a Windows EC2 instance on AWS to practice cloud fundamentals.
- Explored instance setup, access configuration, and basic troubleshooting steps.
